THE following pages contain a list, it is believed complete, of all the papers, whether in MS. or in print, belonging to the University, which concern the Library, together with all the graces on the same subject. The Grace Books, which begin with the Proctors' accounts of 1454, and go on to the present time, are numbered by the letters of the Greek Alphabet. The other references to books in the Registry sufficiently explain themselves. A few references to published works have been introduced, in order to make these materials for the history of the Library as complete as possible. Every entry has been placed, as far as has been possible, in its chronological order.

This may be regarded as a specimen of what might be done for all the institutions of the University, and for all the documents in its possession. The labour and time required for such an undertaking would, however, be beyond the powers of any single individual, though the cost of printing might be spread over several years, or be distributed among the different University departments.

H. R. LUARD.
